

DOCKER Desktop Setup on Windows with WSL 2:

Ref links:

<https://docs.docker.com/desktop/setup/install/windows-install/>

<https://docs.docker.com/desktop/setup/install/windows-install/#wsl-verification-and-setup>

About WSL:

Run below command to check whether WSL is installed or not:

wsl --version

```
Windows PowerShell
PS C:\Users\rohitkumar.singh> wsl
Windows Subsystem for Linux has no installed distributions.
Distributions can be installed by visiting the Microsoft Store:
https://aka.ms/wslstore
PS C:\Users\rohitkumar.singh> |
```

Run below command in PowerShell as an Administrator:

wsl --install

wsl --update

```
Administrator: Windows PowerShell
Windows PowerShell
Copyright (C) Microsoft Corporation. All rights reserved.

Install the latest PowerShell for new features and improvements! https://aka.ms/PSWindows

PS C:\WINDOWS\system32> wsl --install
Windows Subsystem for Linux is already installed.
The following is a list of valid distributions that can be installed.
Install using 'wsl --install -d <Distro>'.

NAME                                FRIENDLY NAME
Ubuntu                              Ubuntu
Debian                              Debian GNU/Linux
kali-linux                          Kali Linux Rolling
OracleLinux_7_9                     Oracle Linux 7.9
OracleLinux_8_10                    Oracle Linux 8.10
OracleLinux_9_5                     Oracle Linux 9.5
SUSE-Linux-Enterprise-15-SP6        SUSE Linux Enterprise 15 SP6
openSUSE-Tumbleweed                 openSUSE Tumbleweed
PS C:\WINDOWS\system32>
```

wsl --update

```
Administrator: Windows PowerShell
Windows PowerShell
Copyright (C) Microsoft Corporation. All rights reserved.

Install the latest PowerShell for new features and improvements! https://aka.ms/PSWindows

PS C:\WINDOWS\system32> wsl --update
Installing: Windows Subsystem for Linux
Windows Subsystem for Linux has been installed.
PS C:\WINDOWS\system32>
```

Install DOCKER Desktop:

The screenshot shows the Docker Docs website in a browser. The address bar displays `docs.docker.com/desktop/setup/install/windows-install/`. The page title is "Install Docker Desktop on Windows". The left sidebar contains a navigation menu with categories like "AI AND AGENTS" and "APPLICATION DEVELOPMENT". The main content area includes a "Docker Desktop terms" section, a paragraph about commercial use, and three download links: "Docker Desktop for Windows - x86_64", "Docker Desktop for Windows - x86_64 on the Microsoft Store", and "Docker Desktop for Windows - Arm (Early Access)". A right sidebar shows a "Table of contents" with links to various installation topics.

Use WSL 2 instead of Hyper-V checkbox:

 Installing Docker Desktop ✕

Configuration

☒ All-users installation (Requires password)

☒ Use WSL 2 instead of Hyper-V

☐ Allow Windows Containers

Windows Containers should only be enabled if you understand the risks. To learn more, [see the documentation](#).

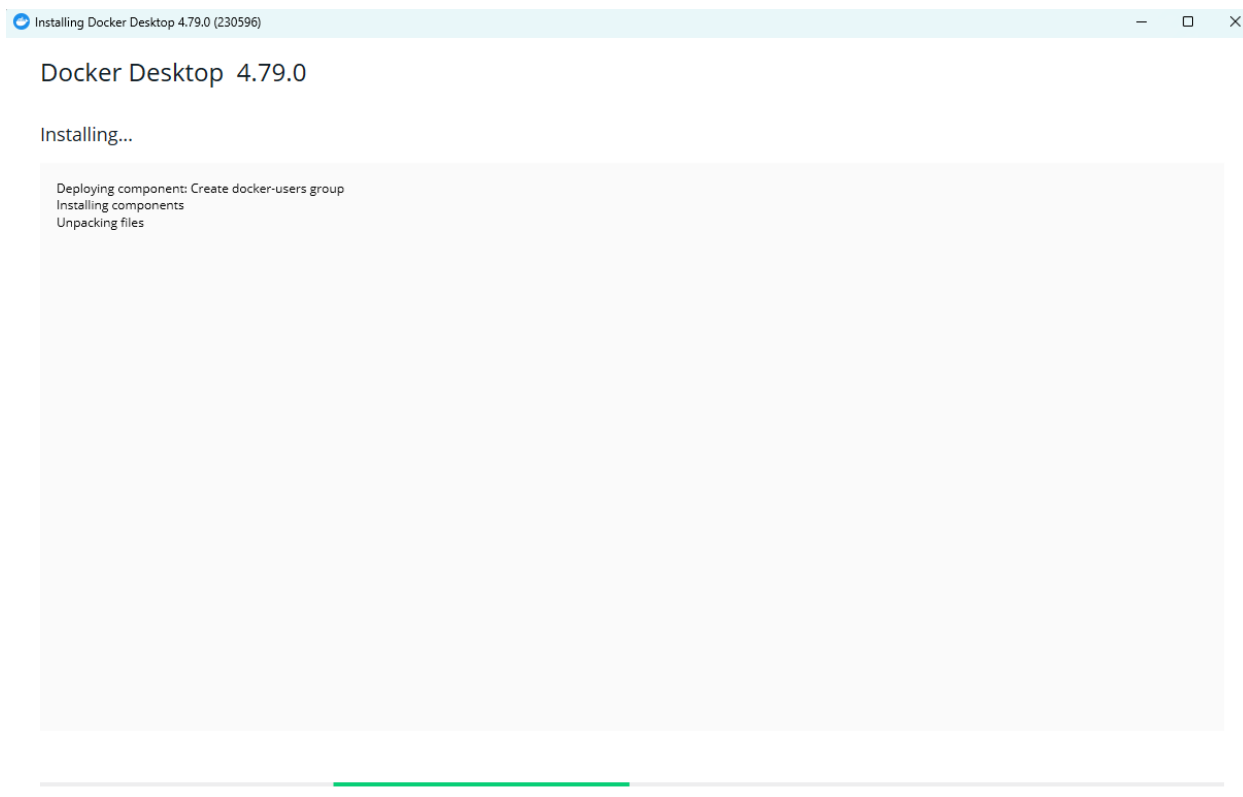

☐ Per-user installation (Beta)

Recommended for most users. Does not require administrator rights, but has some limitations. To learn more, [see the documentation](#).

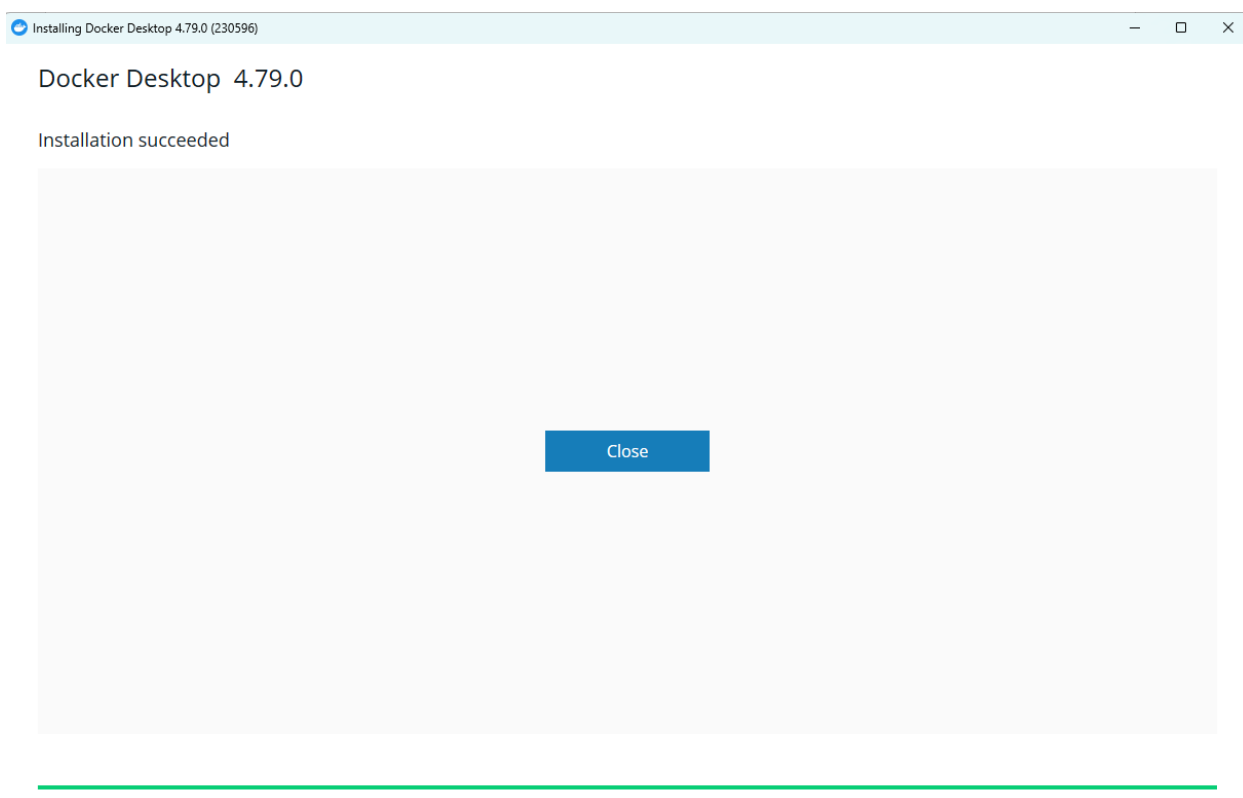

☒ Add shortcut to desktop

Cancel OK

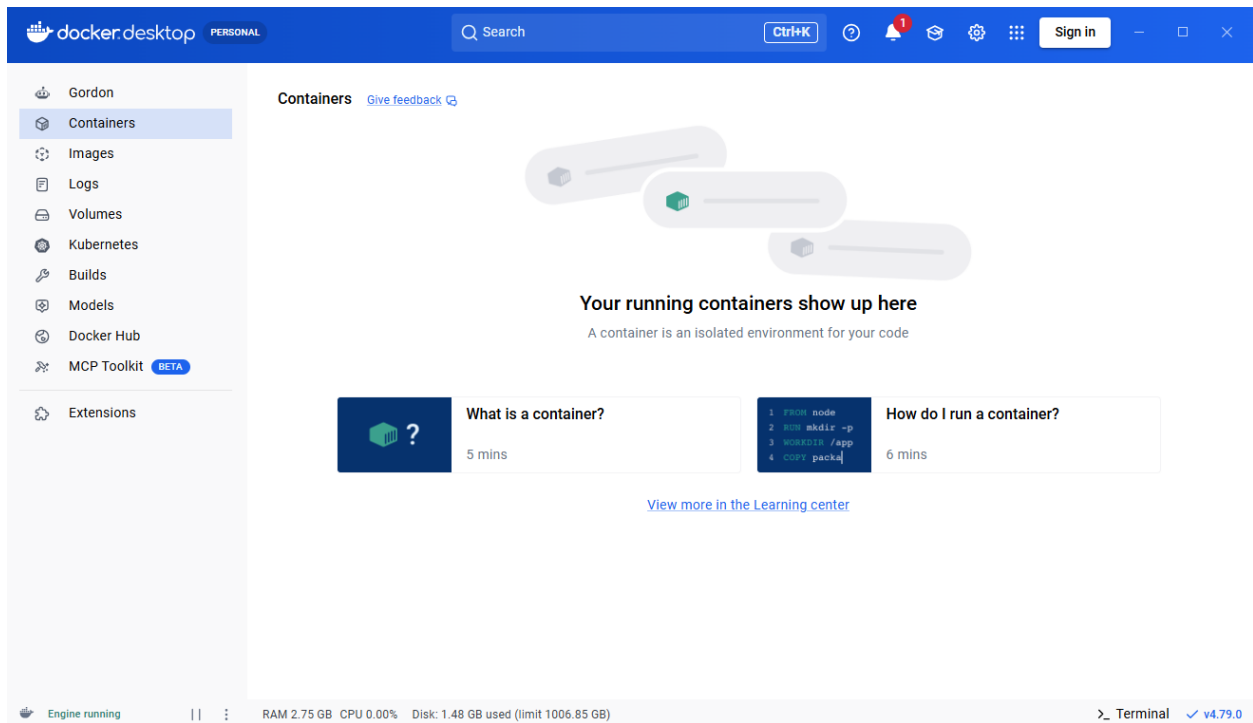

Installation in Progress:

Installation Completed:

Click on DOCKER DESKTOP app:

Verify by running below command in PowerShell:

docker ps

```
Windows PowerShell
PS C:\Users\rohitkumar.singh>
PS C:\Users\rohitkumar.singh>
PS C:\Users\rohitkumar.singh>
PS C:\Users\rohitkumar.singh> docker ps
CONTAINER ID   IMAGE      COMMAND                  CREATED   STATUS    PORTS   NAMES
PS C:\Users\rohitkumar.singh> |
```
